

Defining the future of education: new trends and new goals

Yulia Dzis,
PhD, Associate Prof., SibFU

Objectives

What kind of education will we have in the future?

Methods

- comparative analysis;
- case studies;
- assessment of expert opinions.

Trend 1.

Preprimary education: changing the approach

kindergartens as
educational
organisations

early childhood
agenda

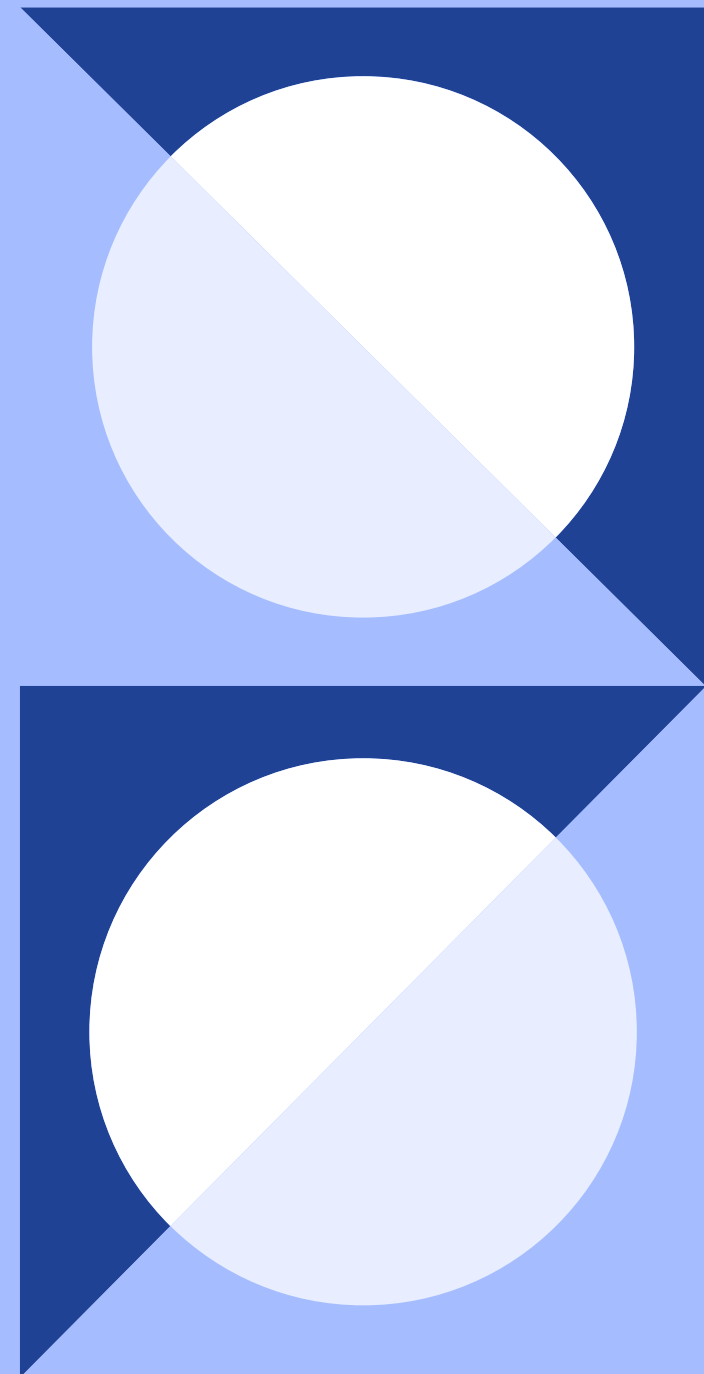

structural and
process quality
features

Trend 2. Secondary education: systematic learning and responsibility

- **subject knowledge;**
- **to apply knowledge in real-life situations.**

Trend 3. Higher education: a shift towards creativity and new technologies

- creative potential is a precondition for a successful career
- technological development

Results:

- ECD programmes;
- New educational solutions;
- Labour market.

Conclusions:

- ◆ Knowledge-based economy and society;
- ◆ Investing in human capital;
- ◆ Subject knowledge and problem-solving abilities;
- ◆ Development of new technologies;
- ◆ Knowledge and skills developed through the entire system of education
